ABOUT

Front-end developer, 4 years. React and TypeScript mostly. I care a lot about accessibility and I am the person on the team who actually runs the screen reader.

WORK

Front-end Developer - Bokra Technologies (Jan 2023 - Present)

- Main developer on the customer portal. React 18, TypeScript, Vite, TanStack Query.
- Took the Lighthouse performance score from 42 to 89, mostly route-level code splitting and killing a 400kb date library we used in two places.
- Migrated the component library from styled-components to Tailwind over about 4 months. Still three legacy screens left, honestly.
- Set up the a11y lint rules and fixed roughly 200 violations. Got the portal through the client's WCAG AA audit.

Front-end Developer - Freelance (Jun 2021 - Dec 2022)

- Built and maintained six small business sites. Next.js and WordPress headless.
- One e-commerce front-end for a local furniture shop, integrated with their existing PHP backend which was... an experience.

EDUCATION

BSc Computer Science - Alexandria University, 2021

SKILLS

React, TypeScript, JavaScript (ES2022), Next.js, Tailwind CSS, HTML, CSS, TanStack Query, Zustand, Vitest, Playwright, Figma handoff, Git, basic Node.js

THINGS I HAVE WRITTEN

"Why your focus ring matters" - talk at Alex Frontend Meetup, Nov 2024
